DETAILED ACTION

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: numeral 220 (para. 0019, line 1).

The drawings are objected to because lines and reference numerals are not uniformly drawn.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will

be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: the specification refers to a "rotor 12". It would appear that this is a misnomer since element 12 is disclosed as reciprocating back and forth. It is furthermore not understood how the device would be capable of operating if element 12 rotated.

Appropriate correction is required.

Claim Objections

Claims 1, 2, 15 and 16 are objected to because of the following informalities: these claims are objected to for incorrectly referring to element 12 as a "rotor". Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There is no reference frame for "eccentric". Relative to what structure is the connecting rod eccentric?

Claim Rejections - 35 USC § 102

Claims 1, 2, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Williams (US 2,023,799). Williams discloses a compressor having a linear motor 34, 35 connected to piston rod 39 via links 40 and 42. These links limit overtravel and undertravel of the piston.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Claims 3 to 14 and 17 to 28 stand withdrawn from further consideration as being drawn to species non-elected with traverse.
